The Port of Tyne is responsible for the conservancy and navigation of the River Tyne. The river is navigable over a distance of 15 miles (24 km) and channel depths are advertised as far as Bill Point, a distance of 6.5 miles (12 km).

The Port is accessible at all states of the tide. There are no length or beam restrictions for vessels in the entrance to the Port. With a controlled depth of 10.0 metres below Chart Datum in the lower reaches of the Port and 13.0 metres below Chart Datum at Tyne Renewables Quay and 12.1 metres at Riverside Quay, ships of a considerable size can be accommodated within the Port.

No height restrictions exist in the lower harbour, but wires crossing the river at Jarrow restrict air draft above this point to 85.7m at Highest Astronomical Tide (HAT).

NOTES

1. Tidal predictions for the River Tyne have been computed by the National Oceanography Centre: Copyright reserved.
2. **The time throughout is Greenwich Mean Time. To arrive at British Summer Time add one hour. British Summer Time begins 29th March 2026 and ends 25th October 2026.**
3. Zero mark on the Port's Tide Gauges corresponds with the datum used in the Institute of Oceanographic Sciences Tide Tables and Admiralty Charts for the River Tyne, and is the level of 2.6m. below Ordnance Datum (Newlyn), i.e. Lowest Astronomical Tide. The heights shown should be added to the depths on the soundings plans and the charts unless they are preceded by a minus sign when they should be subtracted.
4. **Particulars of Dredged Depths**
The river channel is dredged to the following depths below Chart Datum: from the sea to Jarrow Quay Corner (East end) 10.0m. Thence to Jarrow Staith (West end) 6.0m. Thence to Bill Point 5.2m. West of Bill Point depths are not maintained.

The dredged depths in the channel and at berths are subject to silting and to amendment from time to time in line with variations in shipping requirements. Confirmation of all depths should be obtained from the Harbour Master.

5.	MHWS	5.0m.	Mean Spring Range	4.3m.
	MHWN	3.9m.	Mean Neap Range	2.1m.
	MLWN	1.8m.		
	MLWS	0.7m.		

Every care has been exercised to ensure accuracy but the Port does not accept responsibility for any inaccuracy on the part of themselves or others.
